

Professional Strength Probiotic

Far More Effective Results Than Other Probiotics!

Hallelujah Diet “power-packed formula” Professional Strength Probiotic is supported by a Patent Delivery System that delivers up to **60%** of its bacteria all the way to your colon —**giving you far more effective results and helps you to maintain a healthy lifestyle!** *Most probiotic brands boast a high amount of bacteria (CFU), but very few make it past your stomach acids to your colon, where probiotics are needed most. Just one Hallelujah Diet probiotic caplet a day will help support your entire gastro-intestinal tract with beneficial bacteria*.

Moisture and oxygen can damage probiotics in capsules. Hallelujah Diet Professional Strength Probiotic is manufactured as a solid caplet with LiveBac® live bacteria technology. This unique, time released caplet maximizes delivery of Lactobacillus and Bifido bacteria directly to small intestines and colon. LiveBac protects the caplets from moisture and oxygen — and that means you don’t need to keep them in the refrigerator.

In fact, Hallelujah Diet probiotic supplement is stable at room temperature for at least 18 months. Our probiotics are tested in real time to ensure that the CFU claimed on the label is what you get in each caplet, if not more! 10 billion CFU guaranteed through expiration date.

Hallelujah Diet Probiotic Benefits:

- Helps to maintain a strong immune system.
- Helps to fight bacteria that cause diarrhea.
- Helps restore balance between beneficial bacteria and potentially pathogenic bacteria.
- Improve the intestinal function and maintain integrity of the lining of the intestines.
- Releases a significant number of probiotics throughout the entire GI tract, including the colon where probiotics do their best work.
- Non-GMO and Gluten Free product.
- Contains no lactose.

Hallelujah Diet Patented Delivery System

The secret to the incredible effectiveness of Hallelujah Diet Professional Strength Probiotic is a patented probiotic delivery system.

When moistened by fluids in the stomach, a protective layer around the caplet forms to shield the probiotics from gastric acid — which destroys the bacteria in most other probiotics.

Once past the stomach, the timed-release caplet slowly dissolves through the entire digestive tract, ensuring that a significant number of probiotics are released throughout the entire GI tract, including the colon where probiotics do their best work!

Suggested Use: As dietary supplement, take 1 caplet with water prior to any meal or as directed by health professional. Do not crush or chew.

Unconditionally Guaranteed for purity and labeled potency until at least the expiration date. Store with cap tightly closed in a cool, dry place. No refrigeration is necessary. Trace amounts <2.5/ppm of milk protein remain from the probiotic fermentation process. Contains no lactose.
