

NEW CoQ10 Liposomal Liquid

CoQ10 has notoriously poor bioavailability. This new liposomal formulation dramatically boosts the absorption of CoQ10, so that you get better, longer lasting results from each serving. Size: 180 ml

LIPOSOMAL CoQ10 Dietary Supplement helps with:

- Boosts cellular energy by supporting mitochondrial health.
- Part of the electron transport chain in the mitochondria, where it facilitates the generation of ATP, the cell's main energy currency.
- Aging and poor health both combine to reduce cellular production of CoQ10.
- Especially important for optimal heart muscle function and brain function.
- Essential nutritional support for anyone taking a statin drug, as these drugs further deplete CoQ10 levels.

How does CoQ10 help the body?

- CoQ10 is a vital factor in energy production and the energy of the heart.
 - The mitochondria of each cell are the energy production center where CoQ10 is required to turn carbs and fats into energy.
 - It is also a powerful antioxidant that reduces oxidative stress.
 - It plays a role in the health of the inner lining of our blood vessels, helping support normal blood pressure and an optimal inflammatory response.
 - As we age, CoQ10 levels drop. Generally thought that around age 20 CoQ10 levels are highest and gradually decrease with age.
-

CoQ10 will be on Sale during the months of June/July at **25% Off when you place an order of over \$100.00 of our other H!Diet products. (For retail customers only)**
